Introducing TRESICAL Calibration Services

FLIR Systems is pleased to announce a partnership with TRESICAL a well-represented and respected European calibration services laboratory. It is with the utmost confidence that we offer FLIR T&M customers throughout Europe the option of having their equipment calibrated by TRESICAL. The attached chart includes the contact information, by country, for each TRESICAL location.

Over the years, TRESICAL has calibrated and certified many thousands of Extech brand instruments for European customers. With this in mind, we are committed to expanding this relationship to include the FLIR Test & Measurement brand of products.

At this time, we are offering this to country managers as a referral calibration service. Each manager can refer their customers to the appropriate TRESICAL location when a certified laboratory is required.

We look forward to working with you to bring calibration services to a broader customer base, increase business, and raise awareness to the FLIR T&M product line. If you have questions, comments, or suggestions please contact me.

Best Regards,
Tony Campagna
Quality & Engineering Services Director
